AUTHOR Tufts, Cindy, Comp.
TITLE Social Sciences in Forestry, A Current Selected Bibliography, No. 41, October 1976.
INSTITUTION Virginia Polytechnic Inst. and State Univ., Blacksburg. Div. of Forestry and Wildlife Resources.
PUB DATE Oct 76
NOTE 32p.

EDRS PRICE MF-$0.83 HC-$2.06 Plus Postage.
DESCRIPTORS Agriculture; *Annotated Bibliographies; *Bibliographies; Conservation (Environment); *Economics; *Forestry; *Management; Manufacturing; *Natural Resources; Social Sciences; Trees

ABSTRACT

Compiled is a selected bibliography of social sciences in forestry, including economic, historic, sociological, and business aspects. Five major inclusive categories are the following: social science applied to forestry at large, applied to forestry's productive agents, applied to forest production, applied to manufacturing, and applied to marketing, trade, and demand for forest output. Arranged alphabetically by author, each entry contains the source of information, place and date of publication, volume number, and number of pages. A brief description of many references is given. (RH)

****
* Documents acquired by ERIC include many informal unpublished *
* materials not available from other sources. ERIC makes every effort *
* to obtain the best copy available. Nevertheless, items of marginal *
* reproducibility are often encountered and this affects the quality *
* of the microfiche and hardcopy reproductions ERIC makes available *
* via the ERIC Document Reproduction Service (EDRS). EDRS is not *
* responsible for the quality of the original document. Reproductions *
* supplied by EDRS are the best that can be made from the original. *

I SOCIAL SCIENCE APPLIED TO FORESTRY AT LARGE

A UN, FOOD AND AGRICULTURE ORGANIZATION. Report on the FAO/SIDA seminar on forestry social relations for English-speaking countries in Africa and the Caribbean, held in Rome, 1-26 April 1974. FAO/SWE/TF 148:184 pp. 1975.

Report on the FAO/SIDA seminar on forestry social relations for Near East, Asia and Far East, held in Rome, 6-24 March 1972. FAO/SWE/TF 89:183 pp. 1973.

Importance of cooperation between the forestry sector and others; socio-economic role of forestry in the rural economy--e.g. shifting cultivation, poaching.

B2 BASSETT, P.M. and CHOATE, G.A. Timber resource statistics for Oregon, January 1, 1973. USDA, Forest Service Resource Bul. PNW-56:32 pp. 1974.

B2 COST, NOEL D. Forest statistics for the coastal plain of Virginia, 1976. USDA, Forest Service Bul. SE-34:33 pp. 1976.

A report highlighting the principal findings of the fourth Forest Survey inventory of eastern Virginia.

B2 HARRIS, A.S. and W.A. FARR. The forest ecosystem of southeast Alaska, 7, forest ecology and timber management. USDA, Forest Service Gen. Tech. Rep. PNW-25:109 pp. 1974.

Includes wood-using industry.

B2 HEGG, KARL M. Timber resource statistics for the Copper River inventory unit, Alaska, 1968. USDA, Forest Service Bul. PNW-62:55 pp. 1975.

Forest Survey inventory.

B2 HEGG, K.M. Forest statistics for the upper Koyukuk River, Alaska, 1971. USDA, Forest Service Resource Bul. PNW-54:26 pp. 1974.

B2 KINGSLEY, NEAL P. The forest resources of New Hampshire. USDA, Forest Service Resource Bul. NE-43:71 pp. 1976.

Statistical and analytical report on the third Forest Survey of the state, including outlook for timber supplies during the next 30 years.

B2 MANITOBA DEPARTMENT OF MINES, RESOURCES AND ENVIRONMENTAL MANAGEMENT. The forests of Manitoba, 1974. Manitoba Department of Mines, Resources and Environmental Management:82 pp. 1975.

Supersedes bulletin published in 1960.

B2 MANNING, G.H. British Columbia's neglected hardwood resource. Fre. sum. Pacific Forest Research Center, Canada, Rep. BC-X-118:IV+18 pp. 1975.

Why markets that apparently exist remain largely undeveloped.

B2 STERNITZKE, HERBERT S. Shifting hardwood trends in the South. Southern Lumberman 231(2872):72-73. 1975.

Hardwood forest acreage is about the same now as in 1950, but is expected to decline in the immediate future. Hardwood forests are a neglected resource in both research and management. Problems and opportunities for hardwood production in the South are greatest on nonindustrial private lands.

B3 BUTTOUD, G. Poplar resources in France, and their future. In French; Eng., Spa., Ger. sum. Revue Forestiere Francaise 27(1):5-16. 1975.

B3 DURUOZ, E. Studies of the contribution of the Demirkoy state forest enterprise to the economic structure of the forest villages. In Turkish, Fre. sum. Ormancilik Arastirma Enstitusu Yaymlari, Teknik Bulten Serisi 61:80 pp. 1975.

Socio-economic survey of a heavily forested, sparsley populated region of Turkey.

B3 ERVASTI, S. and K. KUUSELA. Forest balance of Finland in 1965-72 and the prospects of industrial wood until 2000. In Finnish; Eng. sum. Folia Forestalia 232:15 pp. 1975.

B3 FOLIA FORESTALIA and INSTITUTUM FORESTALE FENNIAE. Yearbook of forest statistics, 1974. In Finnish and English. Official Statistics of Finland XVII A(7) and Folia Forestalia 255: 214 pp. 1976.

Seventh in a series covering Finland's forest resources, management activities, labor, output, values, transportation, consumption, and trade.

B2 HOLMES, G.D., P.F. WAREING, AND J.L. HARLEY (ORGANIZERS). A discussion on forests and forestry in Britain. Philosophical Transactions of the Royal Society of London B 271(911):45-232. 1975.

Thirteen papers, with discussions, presented at a meeting of the Royal Society in June, 1974.

B3 JANEBA, V. Timber resources and their use in Czechoslovakia. In Czech. Planovane Hospodarstvi 9:16-22. 1975.

B3 MAYDELL, H.J. VON. Forestry and wood industry in the Soviet Union, Part II, Belorussia, Ukraine, and Moldavia. In German; Eng., Rus. sum. Mitteilungen der Bundesforschungsanstalt fur Forst- und Holswirtschaft 105:230 pp. 1975.

B3 MEDVEDEV, L.A. Timber resources and their use in the Ukraine. In Russian. Lesovodstvo i agrolesomelior 45: 3-9. 1975.

B3 PLAISANCE, G. A look at French forests. In French. Foret Privee Francaise 103:105-112. 1975.

Forests and forestry problems.

B3 ROBERT, J.F. Forestry problems in the Vaud. In French. Foret 7:208-213. 1975.

Resource status and trends; timber management.

B3 SAKMAN, E. Demand for forest products, a structural analysis using Markov process. UN, Food and Agriculture Organization FO:SF/IRQ/73/010:101 pp. 1974.

Estimates of wood-product output and apparent consumption in Iraq to the year 2000.

B3 SELBY, A. Afforestation of fields in Finland: agricultural background and recent achievements. Fin. sum. Metsantutkimuslaitoksen Julkaisuja 82(4):53 pp. 1975.

B3 SVERIGES SKOGSAGAREFORENINGARS RIKSFORBUND. Swedish Forestry. Sveriges Skogsagareforeningars Riksforbund: 43 pp. 1975.

Developments in 1974.

B3 VALENZUELA FUERTES, M. DEL C. Reforestation in the High Pyrenees of Aragon. In Spanish. Geographia 15(1):33-43. 1973.

Largely timber resources and wood industry of Spain as a whole.

B3 WESTOBY, J. Forestry in China. Unasylva 27(108): 20-28. 1975.

B4 FOLEY, T.A. Utility of indigenous wood. New Zealand Journal of Forestry 20(1):44-62. 1975.

B4 KIRKLAND, A. Management, classification, and zoning of New Zealand Journal of Forestry 20(1):28-43. 1975.

B4 NEW ZEALAND FOREST SERVICE, INFORMATION SERIES. Statistics of the forests and forest industries of New Zealand to 1974. New Zealand Forest Service, Information Series 33(7):121 pp. 1975.

B5 ANIL, Y. Socio-economic aspects of Yukari Culhali forest village. In Turkish; Eng. sum. Ormancilik Arastirma Enstitusu Yaymlari, Teknik Bulten Serisi 57:77 pp. 1975.

Survey of employment, income, and social structure in a typical E. Central Turkey forest village.

B5 BERUTTI, P.A. Aspects of reforestation in Brazil. In Portuguese; Eng. sum. Brasil Florestal 6(21):3-7. 1974.

Forest resources and forestry problems. Present afforestation program; future importance of pulp and paper industry.

B5 EISENHAUER, G. Utilization of natural forests, exemplified by conditions in Chile. In German; Eng. sum. Forstarchiv 46(6):120-124. 1975.

Highly wasteful exploitation methods; the annual cut and the unsatisfactory use of timber felled; mechanization's effect on output and costs, particularly its socio-economic consequences.

B5 ISMAIL BIN HAJI ALI, HAJI. The potential of Malaysian forest resources for industry and trade development. Malaysian Forester 37(3):142-151. 1975.

Plans for integrated development of the forest economy over the next 20 years.

B5 MARTEN, K.D. Forestry in the Solomon Islands. Coedwigwr 27:26-31. 1974-75.

Logging, silviculture, and utilization of timber during the last decade.

B5 NAGARAJU, S. and S. KHOT. Development of forest based industries in Karnataka State. IPIRI Journal 4(4): 133-140. 1974.

Forest resources, industries (lumber, plywood, particle board, pulp and paper) and development programs for the state. The state has good potential for development of forest industries, and priorities have to be worked out for allocation of resources.

B5 TRAN VAN NAO. Forest resources of humid tropical Asia, in natural resources of humid tropical Asia. UN, Economic Social and Cultural Organization, Natural Resources Research 12:197-216. 1974.

Productive potential, consumption, and methods of making more efficient use of forest resources.

B5 OLAWOYE, O.O. The agri-silvicultural system in Nigeria. Commonwealth Forestry Review 54(3/4):229-236.

Merits of each of two taungya systems, traditional taungya (individual family enterprise) and departmental taungya (in which the farmers serve as employees of the state).

B5 ONOCHIE, C.F.A. and ADEYOJU, S.K. (EDS.). The development of forest resources in the economic advancement of Nigeria. Forestry Association of Nigeria, Proceedings of the Inaugural Conference, University of Ibadan, October 6-9, 1970:459 pp. 1972.

Forty-eight papers on the forest resources of Nigeria and their relation to the national development.

B5 PERSSON, R. Forest resources of Africa. An approach to international forest resource appraisals, Part I, country description. In English; Swe. sum. Rapporter och Uppsatser, Instituitionen for Skogstaxering 18:294 pp. 1975.

Inventory and description of the forest resources natural vegetation, closed forests, man-made forests, etc. of all African countries.

B5 UN, FOOD AND AGRICULTURE ORGANIZATION. Forestry and forest industries development, Malaysia, 1970-75. UN, Food and Agriculture Organization FO:DP/MAL/72/009:5000 pp. 1976.

A survey of the nation's forests and forest-related resources and policies.

C1 CONNAUGHTON, CHARLES A. Now is the time to develop a national policy for American forests. Journal of Forestry 74(4):204-205. 1976.

Calls for a policy that can help cope with urgent problems in American forestry, some of which are: questions raised over the forest owners, evaluation of the program developed under the Humphrey-Rarick Act.

C1 CLAWSON, M. Forests for whom and for what? Johns Hopkins Univ. Press ISBN 0-8018-1698-X:175 pp. 1975.

Issues of forest policy in the USA from an economic viewpoint.

C1 HAWAII DEPARTMENT OF LAND AND NATURAL RESOURCES, DIVISION OF FORESTRY. A program for the state forest lands of Hawaii. Hawaii Department of Land and Natural Resources, Division of Forestry:58 pp. 1975.

C1 HOLZAPFL, R. Attempts at reorientation in Swedish forest policy. In German. Forstarchiv 46(10):197-203. 1975.

Change from a policy of sustained volume yield to one of sustained financial yield. A government committee recommended, in 1973, temporary increases in annual cuts to support the demands of the Swedish wood-consuming industries, a system of taxes and subsidies to increase the supply of roundwood and large-scale mechanization. Subsequent directives to a new Committee on forest policy imply partial rejection of these recommendations.

C1 KING, K.F.S. The formation of national forest policies. UN, Food and Agriculture Organization:12 pp. 1974.

C2 RICH, STUART U. Economic vs. political considerations in the management of our national forests. Forest Products Journal 26(4):7. 1976.

Examples of the role of the USA political system in forest resource allocation; pressures by economists and industry groups for a more rigorous application of economic criteria.

I SOCIAL SCIENCE APPLIED TO FORESTRY AT LARGE

C1 USDA, FOREST SERVICE. Environmental program for the future, a long term forestry plan (draft). USDA, Forest Service:236 pp. 1974.

F JOURNAL OF FORESTRY. Improvement and change in resource management and forestry education. Journal of Forestry 73(2):74-102.

Eight articles and an editorial.

F LUUKKANEN, O. Training of Thai forestry graduates in Finland. In Finnish; Eng. sum. Silva Fennica 2:88-100. 1975.

F OSARA, N.A. The role of professional foresters in economic development and in achieving social goals. The International Union of Societies of Foresters, 2nd Congress, Helsinki:36-66. 1975.

F OVINGTON, J.D. Continuing education in forestry for a world environment of rapid technological, economic and social change. Australian Forestry 38(1):49-58. 1975.

Forestry schools can meet the need for continuing education by designing the professional curriculum, not simply for presentation to youths, but for administration to foresters periodically throughout their careers.

F RANTA, J.P. Continuing training and on-job training, Rep. of the Seventh Session of the FAO Advisory Committee on Forestry Education, Hyvinkaa 14-16 August 1974:55-58. 1975.

F RICHARDS, B.N. and B.J.F. JAMES. Continuing education for forest managers. Australian Forestry 38(1):59-64. 1975.

Responsibility for continuing education rests with forestry schools, employers, and professional societies.

F WINTERS, R.K. Forestry beginnings in India. Journal of Forest History 19(2):82-90. 1975.

Teak trade led to public forestry administration in India, the first professional forestry outside western Europe.

G ADEYOJU, S. KOLADE. Forestry development in the new economic community of West African states (ECOWAS). Central African Republic, African Forestry Commission, Fourth Session, Bangui:28 pp. 1976.

Prospective status, contributions, and problems of forestry in economic development if the 1975 Treaty of Lagos is widely ratified and ECOWAS becomes effective.

G KING, K.F.S. Putting the emphasis on tropical forestry. Unasylva IV:30-35. 1975.

Aspects of forestry that are important to the general development of rural peoples: forestry and agriculture, tropical forestry development, harmonizing forestry with food production and rural development, pulp and paper industry, pulpwood plantations. Proposed forms of international action.

G KING, KENNETH F.S. The forestry sector and economic international relationships. Univ. of Toronto, Faculty of Forestry and Landscape Architecture:11 pp. 1975.

History and status of the effects of timber exploitation, conversion, and trade upon developing economies.

G LEWIS, GORDON D. Major problems in rural development unique to the great plains, a panel. In Rural development in the Great Plains, problems and potentials. Great Plains Agricultural Council Pub. 75:108-112. 1975.

Development will result from increased recreation and mineral extraction. New concepts, regulations, and laws on land ownership, land use and reclamation, and water quality and quantity are required if we are to avoid extensive environmental damage. Social and economic considerations must be evaluated to guide land-use planners.

G REILLY, J.J. Impact of softwood plantations on rural economic development in Australia. Australian Forestry 37(2):142-152. 1974.

Prospective effects of increased softwood production in Queensland during the next 30 years on employment and income of forest workers, with extension to Australia as a whole.

G STROHM, A. Aids to decision-making relating to the location of factories for the production of prefabricated houses or standardized parts, and to state policies regarding regional industrial development, a contribution to the development of structurally weak regions in the German Federal Republic. In German. Mitteilungen der Bundesforschungstalt fur Forst- und Holzwirtschaft 107:224 pp. 1975.

G SUMITRO, ACHMAD. Foreign investment in the forest-based sector of Indonesia, increasing its contribution to Indonesian development. Univ. of Minnesota, Dissertation Ph.D.:248 pp. 1975.

Objectives and motivations of the host country and the foreign investors. East Kalimantan as the case.

G UN, FOOD AND AGRICULTURE ORGANIZATION, COMMITTEE ON FOREST DEVELOPMENT IN THE TROPICS. Rep. of the Third Session, Rome, Italy 14-17 May 1974 FDT/74/Rep:65 pp. 1974.

Contribution of forestry to the development and management of dry zones in the tropics; FAO studies on working techniques in tropical forestry.

G VEIGA, R.A.A., O.J. OLIVEIRA NETO, W.J. JORGE, F. G.A. SOUZA, and C.M. CARVALHO. Socio-economic aspects of forestry development in Brazil with regard to fiscal incentives. In Portuguese; Eng. sum. Floresta 6(11):49-53. 1975.

Results of a 5-year government incentive program in the Botucatu region; possibilities for continued growth both there and in other regions.

H ELLEFSON, PAUL V. Forest practices and water quality, opportunities for legislative and educational responses. Paper presented at the American Forestry Association Workshop on Forest Practices and Water Quality, Chicago, April 1976: 13 pp. 1976.

H UN, EDUCATIONAL SCIENTIFIC AND CULTURAL ORGANIZATION, PROGRAM ON MAN AND THE BIOSPHERE. International working group on project 1, ecological effects of increasing human activities on tropical and sub-tropical forest ecosystems, Rio DeJaneiro, 11-15 February 1974. UN, Educational Scientific and Cultural Organization 16:96 pp. 1974.

Effects of management practices and human activities generally; proposals for research and education.

H UN, EDUCATIONAL SCIENTIFIC AND CULTURAL ORGANIZATION, PROGRAM ON MAN AND THE BIOSPHERE. Expert panel on project 2, ecological effects of different land uses and management practices on temperate and mediterranean forest land scapes, Paris, April 16-19, 1974. UN, Educational Scientific and Cultural Organization 19:80 pp. 1974.

Problems of recreational use and industrial pollution of temperate and Mediterranean forests.

H URSIC, S.J. Harvesting southern forests, a threat to water quality. Proceedings of a Southeastern Regional Conference on Nonpoint Sources of Water Pollution, Virginia Polytechnic Institute and State Univ., Blacksburg:145-151. 1975.

Sediment is treated as the primary pollutant after harvesting, with emphasis on the southern pinery.

H WIECKO, E. The function of forests and stands of trees in safeguarding the natural environment. In Polish. Przeglad Geograficzny 45 (4):707-725. 1973.

Biological, economic, and social significance of trees; afforestation programs to increase area of protection forests.

II APPLIED TO FORESTRY'S PRODUCTIVE AGENTS

A1 BECKER, G. Analytic job evaluation, a contribution of work science to the development of rational personnel policies in forestry enterprises. In German. Allgemeine Forstzeitschrift 30(29):579-582. 1975.

Based on work cited next.

A1 BECKER, G. The development of job content and job structures in forestry enterprises, Vol. I and II. In German; Eng. sum. Mitteilungen der Forstlichen Versuchs- und Forschungsanstalt Baden-Wurttemberg 60:337 pp. 1974.

Effects of changing forestry practices on the requirements for demands made on workers, analyzed by job-evaluation methods. Vol. II contains 60 examples of the use of these methods.

A1 GLASER, H. Abridged translations from: Conditions of work and life in the timber industry; ILO, Geneva, 1972. (I) Training of forest workers in Europe and North America. Characteristics of forest workers and labor market in Norway, 1973-78.

A3 HOLMSTROM, S. Combined forestry and agricultural enterprises, with discussion. In Swedish. Kungl. Skogs- och Lantbruksakademiens Tidskrift 114(1/2):58-82. 1975.

Opportunities for efficient use of labor in integrated farming and forestry.

A3 PENTTILA, S., and J. HAMALAINEN. Daily earnings and work output in piecerate planting in Finland 1972. In Finnish; Eng. sum. Folia Forestalia, Institutum Forestale Fenniae 221:32 pp. 1975.

II APPLIED TO FORESTRY'S PRODUCTIVE AGENTS

Results of a study based on a nation-wide sample of the amounts paid for manual planting by piece-work, the output achieved, and the length of working day.

A4 KUMER, P. The human role in accidents in forestry. In Slovenian; Eng., Ger. sum. Gozdarski Vestnik 33(6):305-311. 1975.

Analysis of accident statistics for Slovenia, 1967-73. Subjective factors are the most important causes of accidents in forest work. Some preventive measures.

A4 LUNDGREN, K.O. Working conditions that are kind to workers' backs. In Swedish. Skogsagaren 51(6/7):14-15. 1975.

A system of logging designed to avoid back trouble among workers.

A4 REVUE DU BOIS ET DES SES APPLICATIONS. Accidents at work in the wood industries. In French. Revue du Bois et des ses Applications 30(6):41-46. 1975.

Tables and graphs on the frequency and types of accidents in wood industries in France; social and financial consequences.

B1 BRANDL, H. Economic criteria for joining forest cooperatives. In German. Mitteilungen der Forstlichen Versuchs- und Forschungsanstalt Baden-Wurttemberg 58:97 pp. 1975.

Income, cost, and tax considerations relevant to deciding whether private or communal owner should join a cooperative.

B1 SAETHER, R. and VEIDAHL, A. Supply of industrial wood from different ownership groups in Norway during the period 1932-1965. In Norwegian; Eng. sum. Tidsskrift for Skogbruk 83(3):283-351. 1975.

B2b KALBERMATTEN, J. DE and J. RITHNER. Forty years of sustained management in the forests of the Commune de Monthey, 1936-1975. In French. Foret 7:195-202. 1975.

Developments in these Swiss forests since their purchase from private owners in 1936.

II APPLIED TO FORESTRY'S PRODUCTIVE AGENTS

B3a JARVELAINEN, V.P. Forestry behaviour of private forest owners in Finland. In Finnish; Eng. sum. Folia Forestalia, Institutum Forestale Fenniae 222:190 pp. 1974.

B3a KASAHARA, Y. A study of Forest Owners' Cooperative in Japan. In Japanese; Eng. sum. Bulletin of the Kyushu Univ. Forests 49:106 pp. 1975.

Development, aims, and problems since its 1908 beginning.

B3a BOIS HEBDO. Private forestry in France. In French. Bois Hebdo 81(40):28-30. 1975.

Circumstances for establishing the Regional Centers for Private Forestry; contributions of the Centers to improvement of practices on private forest holdings.

B3c BONT, A. Consolidation of private forest holdings. In German. Wald und Holz. 57(1):7-10. 1975.

Results of a survey in Switzerland, of the opportunities for reallocation of land to form manageable private parcels.

B3c BOSSE, G. and K. HAGELBERG. The contribution of forestry cooperatives in Lower Saxony to the overcoming of the windthrow diaster of 13 November 1972. In German. Forst- und Holzwirt 30(11):209-210. 1975.

Structure of various types of cooperative associations and their role in salvage work.

B3c GAILLARD, M. An example of the creation of a forest management group, the Bois des Echelles. In French; Eng. Spa., Ger. sum. Revue Forestiere Francaise 27(1):17-31. 1975.

Cooperative association organized under a 1963 French law.

B3c HEIKINHEIMO, L. and M. PALO. Increasing investments in Finnish forestry. Loggers Handbook 32:12 pp. 1972.

Plans for increasing timber productivity to meet predicted national needs; merits, limitations.

B3c JOURNAL OF FORESTRY. Forestry incentives. Journal of Forestry 73(4):202-225. 1975.

II APPLIED TO FORESTRY'S PRODUCTIVE AGENTS

Seven papers on public assistance to private forestry in the USA.

B3c MAKELA, J. Are the forest owners willing to work in forests outside their own farms? In Finnish; Eng. sum. Teho 3:8-10. 1973.

B3c NOER, H. An evaluation of economic disadvantages associated with fragmentation in forest holdings. Tidsskrift for Skogbruk 83(2):233-248. 1975.

Costs and revenues itemized for each of 4 size classes of holdings in Norway.

B3c OLAWOYE, O.O. Private forest farming in Nigeria. Univ. of Ibadan, Department of Forest Resources Management Bul. 7:24 pp. 1975.

B3c PIHA, A. On the creation of the Act on forest owners' associations passed in 1950. In Finnish; Eng. sum. Silva Fennica 9(1):49-73. 1975.

Fifty-year background of the Finnish law on farmers' forestry cooperatives.

B3c REUNALA, A. Structural change of private forest ownership in Finland. Fin. sum. Metsantutkimuslaitoksen Julkaisuja 82(2):79 pp. 1974.

Past and probable future changes in private forest ownership; apparent increase in holdings of owners other than farmers.

C3 BLOETZER, G. Forestry coordination and implementation tasks under the Swiss federal law on land-use planning. In German. Beiheft zu den Seitschriften des Schweizerischen Forstvereins 55:53 pp. 1975.

Implications of this law for forestry; recommendations.

C3 BOWMAN, GEORGE A. (ED.). Land use, issues and research needs for planning policy and allocation, a report of a task force of the National Association of State Universities and Land Grant Colleges and USDA. Washington State Univ., College of Agriculture:78 pp. 1976.

Land-use research problem analysis for the USA. Forest and rangeland section, pages 19-26, includes research recommendations.

II APPLIED TO FORESTRY'S PRODUCTIVE AGENTS

C3 HAVAS, P. Problems of land use at the northern climatic border of the forest. MAB Symposium, Stockholm: 7 pp. 1975.

C3 PIHKALA, K.U. Economics of forest land clearing for agriculture. Fin. sum. Maataloustieteellinen aikakauskirja 47(4):283-383. 1975.

C4 REIDEL, CARL H., and BRIAN R. PAYNE, ET AL. Forest land-use research priorities in the Northeast, a report prepared for the Northeastern Regional Planning Committee, Northeastern Forestry Committee, Forest Land-Use Subcommittee. USDA Forest Service and Seven Forestry Schools RP 2.08:III+21. 1976[?].

A sketch of proposed research, drawn up by a committee representing New England universities and the Forest Service, USDA.

III APPLIED TO FOREST PRODUCTION

A1 ALLEGMEINE FORSTZEITSCHRIFT. The Zeil forest enterprise (upper Swabia). In German. Allegeine Forstzeitschrift 29(51/52):1149-1195. 1974.

Timber-growing, aesthetic and harvesting practices and their consequences on an illustrative central European estate.

A1 CLAWSON, M. Economic trade-offs in multiple-use management of forest lands. American Journal of Agricultural Economics 56(5):919-926. 1974.

Compatibility of major forest uses; need for quantitative information on interactions among uses; limitations of financial analyses; source and incidence of benefits and costs; social, cultural, administrative, and technical feasibility of multiple-use management.

A1 ENABOR, E.E., and S.K. ADEYOJU. An appraisal of departmental taungya as practiced in the southeastern state of Nigeria, a report to the Director, Federal Department of Forestry, Ibadan:77 pp. 1975.

A1 HALLS, LOWELL K. Economic feasibility of including game habitats in timber management systems. In Transactions of the 40th North American Wildlife and Natural Resources Conference, 1975:168-176. 1975.

Effective timber management on public and private lands can be coordinated with wildlife needs to obtain revenues from hunting as well as timber.

A1 MAKKONEN, O. On "the multiple use" of forests in ancient times. In Finnish; Eng. sum. Silva Fennica 2:116-129. 1975.

A1 MAY, JACK T., JAMES L. BUCKNER, and S.J. URSIC. Multiple use in the southern coastal plains in the United States. Georgia Forest Research Council Rep. 35:24 pp. 1976.

History. Multiple uses of forest lands are now being professionally planned and implemented by industrial landowners. Water is fast becoming an important consideration in multiple-use management, second only to timber.

A1 PEARSON, H.A. Range and wildlife opportunities. In Proceedings of a Symposium on Management of Young Pines: 19-27. 1974.

Range and wildlife resources, their relation to forest management practices such as site preparation, reforestation, thinning, clearcutting, prescribed burning, and fertilization. Practices can be designed for either single or multi-resource yields, depending on the land manager's objectives.

A1 SCHEIRING, H. Multiple-use forestry in a mountainous country. In German; Fre. sum. Schweizerische Zeitschrift fur Forstwesen 126(6):488-497. 1975.

Need for public contribution to the cost of private forest management involving uses not self-supporting, such as water production, recreation, and game management.

A1 TOWLER, R.W. Forestry in national parks. Quarterly Journal of Forestry 69(3):129-136. 1975.

Timber production and farming in British national parks: issues, recommendations.

A1 URSIC, S.J. Pine management influences the southern water resource. In Proceedings of the Symposium on Management of Young Pines:42-48. 1974.

Activities required to meet anticipated demand for southern pine products in the next 25 years may temporarily impair water quality and significantly reduce streamflow and groundwater recharge. However, management practices can probably ameliorate such changes without seriously interfering with wood production.

A3 BYRD, NATHAN A. Forest grazing opportunities. Forest Farmer 35(7):8-9, 20. May 1976.

Forest range can provide valuable forage in spring and summer at minimum cost, and it does not require fertilization.

A3 SPRINGFIELD, H.W. Characteristics and management of southwestern pinyon-juniper ranges, the status of our knowledge. USDA,Forest Service Pap. RM-160:32 pp. 1976.

III APPLIED TO FOREST PRODUCTION

A5a BROWN, PERRY J., BEVERLY L. DRIVER, and GEORGE H. STANKEY. Human behavioral science and recreation management. Fre., Ger. sum. XVI IUFRC World Congress, Division VI, Oslo, Norway, June 1976:53-63. 1976.

How do recreationist-preference and behavior information contribute to recreation management? How well have researchers uncovered and clarified such information? How can behavioral sciences be more useful in recreation management?

A5a BURCH, WILLIAM R., JR. and ROGER W. CLARK, (EDS.). Backcountry management in the White Mountains of New Hampshire. Yale Univ:105 pp. 1976.

A collection of papers including: Management alternatives for the Great Gulf wilderness area, Information systems --an overlooked backcountry management tool, Backcountry safety and resource protection in winter recreation, Management proposals for the Appalachian Hut System, Back country trails, Roads to management, Hunting and fishing in the White Mountain National Forest, Ski-touring vs. snowmobiling, Camping in the White Mountain National Forest, Trends in demographic and survey data, and The prospect.

A5a CAPEL, R.E., and A.G. TESKEY. Recreational value of the forest in southeastern Manitoba. Environment Canada Information Rep. NOR-X-148:28 pp. 1976.

Annual benefits exceed $6 million. Possible changes in forest management and fire control are not expected to alter significantly the total recreation benefits.

A5b CORDELL, HAROLD K. The state-of-the-art in developing and operating intensive-use natural resource recreation sites. North Carolina State Univ.:29 pp. 1976.

A5d KELLOMAKI, S. The aesthetic values of a forest. In Finnish; Eng. sum. Suomen luonto 6:315-318, 365. 1975.

A5d LITTON, R.B., JR. Esthetic resources of the lodgepole pine forest. Proceedings of a Symposium on Management of Lodgepole Pine Ecosystems, Washington State Univ., Pullman, October 9-11, 1973:285-296. 1975.

Rocky Mountain region, USA.

A5d MURTHA, P.A. and M. GRECO. Appraisal of forest aesthetic values, an annotated bibliography. Fre. sum. Information Rep., Forest Management Institute, Canada FMR-X-79:56 pp. 1975.

Past 15 years.

A5d SCHWEITZER, DENNIS L., JAMES R. ULLRICH, and ROBERT E. BENSON. Esthetic evaluation of timber harvesting in the northern Rockies--a progress report. USDA, Forest Service. Research Note INT-203. 1976.

Montana and Wyoming studies confirm that people like best the forest scene that appears undisturbed by man.

A6 AUKERMAN, ROBERT, and WILLIAM T. SPRINGER. Effects of recreation on water quality in wildlands. Eisenhower Consortium Bul. 2:25 pp. 1976.

Recreational use is not at present a significant cause of bacterial water pollution; thus recreational opportunities may be provided near water with a minimum investment.

A7 SPEIDEL, G. Determining an economically tolerable density of ungulate game. In German; Eng. sum. Forstarchiv 46(11):221-228. 1975.

Game density should be determined on the basis of the percent ratio of net costs (i.e., costs of damage and protection minus returns from shooting fees, venison, etc.) to (a) gross financial yield, or (b) costs of regeneration and in a forest free from game. The maximum permissible percent would be determined politically.

A8 ANDRESEN, JOHN W. Community and urban forestry, a selected and annotated bibliography. USDA, Forest Service, State and Private Forestry, Atlanta, GA:195 pp. 1974.

2,250 references on urban forestry.

B1 BECANOVIC, T. The supply factor in forestry. In Swedish; Eng. sum. Sveriges Skogsvardsforbunds Tidskrift 73 (4):395-409. 1975.

Short-term supply of forest products in relation to costs of felling, transport, silviculture, and forest investment on the one hand, and market price variations on the other. Application to marketing policy.

B2 GAGNON, J.D., J.M. CONWAY, and H.S.D. SWAN. An economic study of the Grand'Mere plantations 10 years after fertilization. In French; Eng. sum. Forestry Chronicle 52(1):26-29. 1976.

Potassium sulphate treatment increased yield as much as 4 cunits per acre and reduced wood-growing cost to about $7 per cunit.

B3 PAYANDEH, BIJAN. Evaluating the cost-effectiveness of planting and direct seeding of black spruce by simulation. Canadian Forestry Service, Department of the Environment Rep. O-X-238:28 pp. 1975.

A procedure for simulating the development of black spruce and estimating regeneration cost per unit of yield as a function of whether the stand is regenerated by seeding or planting and, for each method, the cost rates, stocking standards, and estimated survival probabilities.

B3 SAKMAN, E. Economics of seedling production, 1974. UN, Food and Agriculture Organization FO:SF IRQ/73/010:44 pp. 1974.

Cost and revenue analysis for Iraq's 16 forest nurseries to estimate optimal budget allocation among them.

B3 WEAVER, G.H., and CARY A. OSTERHAUS. Economic analysis of planting costs in loblolly pine management. Journal of Forestry 74(4):217-219. 1976.

Investment schedules for regeneration of loblolly pine can be developed on the basis of regeneration costs, site productivity, and expected product values. Only the best sites justify capital-intensive regeneration methods.

B3 WILLIAMS, M.R.W. Commercial tree-planting close to the upper altitudinal limits for timber-production on the northern Pennines. Quarterly Journal of Forestry 69(4): 219-221. 1975.

With grant aid and tax advantages, Sitka spruce of yield class 10 can produce an annual rate of return of six percent on upland sites in northern England.

B4 VLADIMIROVA, G.A. Determining the economic effectiveness of thinnings. In Russian. Lesnoe Khozyaistvo 6:32-33. 1975.

Results of thinning an oak stand established in 1919 by natural regneration in the Chuvash ASSR (E. Russia). Growing stock is similar in the thinned and unthinned parts, but the thinned parts are better quality. The moderate thinning was the most profitable.

B5 LEMBERSKY, MARK R. Maximum average annual volume for managed stands. Forest Science 22(1):69-81. 1976.

Markov decision process is used to determine the management policy which will result in the maximum sustainable average annual yield of merchantable timber.

E BRABANDER, H.D. Estimating income and net profit in private forest enterprises of different sizes. In German. Allgemeine Forstzeitschrift 30(40):833-836. 1975.

E DUTROW, G.F. and J.R. SAUCIER. Economics of short-rotation sycamore. USDA, Forest Service SO-114:16 pp. 1976.

Re-examination of a previously studied issue. Unless costs can be greatly reduced and markets enlarged, growing sycamore on a short rotation is financially attractive only for industrial landowners. Greatest profit comes from good sites, wide spacings, and 4- to 5-year cutting cycles.

E FLICK, WARREN A. An input-output model of public forest management. Canadian Journal of Forestry 6:170-178. 1976.

The Leontief model is applied to a public firm. The sectors are the firm's enterprises in a multiple-use program. Shadow prices are derived for the output of each enterprise, as a guide to managerial review.

E GADDO, M. Computer-assisted management planning. In Italian; Eng. sum. Montie Boschi 26(4):27-41. 1975.

Methods developed for computerized production of management plans for 195,000 hectares of coniferous forest managed by the Trento Forest Service and for handling data recorded for environmental and land-use planning.

E GOFORTH, MARCUS H. and THOMAS J. MILLS. A financial return program for forestry investments, including sensitivity of results to data errors. USDA, Forest Service Bul. 488:18 pp. 1975.

Program previously developed for calculating indices such as internal rate of return and discounted net worth is enlarged to permit sensitivity analysis.

E GREEN, ALAN W. Assessing the timber resource situation on a working circle using inventory data. USDA, Forest Service INT-183:43 pp. 1976.

Some guides to management planning; the Apache-Sitgreaves National Forest in Arizona as a case.

E HOLMES, W.D. and C.J. INGLIS. Economic surveys of private forestry; income and expenditure, Scotland. Univ. of Aberdeen, Department of Forestry:47 pp. 1976.

Income, expenses, use of labor, forestry practices, and growing-stock structure for 57 estates, 1961-74.

E JAATINEN, E. Energy accounting in forestry. MAB Symposium, Stockholm:11 pp. 1975.

E LEUSCHNER, W.A., J.R. PORTER, M.R. REYNOLDS, and H.E. BURKHART. A linear programming model for multiple-use planning. Canadian Journal of Forest Research 5(3):485-491. 1975.

Objective is to maximize timber output within budget, nontimber, and other constraints. Analysis of the forest separately by 20-acre cells permits identifying the location of activities.

E BURKHART, HAROLD E., WILLIAM A. LEUSCHNER, R. DEAN STUCK, JOHN R. PORTER, and MARION R. REYNOLDS. Aids for unit planning on the Appalachian National Forests. Virginia Polytechnic Institute and State Univ., Division of Forestry and Wildlife Resources FWS-1-76:VI+20 pp. 1976.

C2a AMERICAN EMBASSY IN HELSINKI. A survey of Finland's recession-impacted pulp and paper industry. U.S. Department of Commerce, Pulp, Paper, and Board XXXII(2):6-8. 1976.

The industry in 1975 suffered the worst setback since World War II. Downward trends continue in 1976. Only the communist nations increased their imports of Finnish pulp and paper products.

C2a POST, HOWARD A and DONALD W. BUTTS. Commodity trends, January-March 1974-76. U.S. Department of Commerce, Pulp, Paper, and Board XXXII(2):3-5. 1976.

Pulpwood, other paper raw materials, woodpulp, paper, and paperboard production, consumption, trade, by region; status, trends, prospects.

C2a SMITH, LEONARD S. Slow recovery forecast for Belgium's depressed pulp and paper industry. U.S. Department of Commerce, Pulp, Paper, and Board XXXII(2):9-12. 1976.

IV APPLIED TO MANUFACTURING

The industry, struck by depression in 1975, will be slow to recover.

C2c BONES, JAMES T., and DAVID R. DICKSON. Pulpwood production in the Northeast, 1974. USDA, Forest Service Resource Bul. NE-42:22 pp. 1976.

Annual report based on a canvass of pulpmills in 14 states. Comparisons with 1973. Trends.

C3a JAPAN PLYWOOD MANUFACTURER'S ASSOCIATION. Plywood industry in Japan. Japan Plywood Manufacturer's Association: 13 pp. 1973.

Status, trends, prospects.

C4 BYGREN, K.G. and B. LIDBERG. Production of full-tree chips, a review. In Swedish; Eng. sum. Redogorelse, Forskningsstiftelsen Skogsarbeten 2:23 pp. 1975.

Potential supply and demand in Sweden; economic aspects.

C9 KAILA, Y.P.I. Wood based panel industries. World Wood 3:42. 1976.

Status and trend of the particleboard industry in Finland.

C11 HOUGHTON, JOHN E., and LEONARD R. JOHNSON. Wood for energy. Forest Products Journal 26(4):15-18. 1976.

Although not likely to be a primary energy source, wood does seem to have energy potential in localized areas where wood residue volumes are high and energy consumption relatively low. Situation for the world, the United States, and Idaho.

V APPLIED TO MARKETING, TRADE, DEMAND FOR FOREST OUTPUT

A1 KALKKINEN, E. The evolving pattern of supply and consumption of forest products in Europe. Journal of the Institute of Wood Science 7(1):2-7. 1975.

Consumption and output of timber products in Europe since World War II; resources; future consumption.

B1a JUSLIN, HEIKKI, and PETRI WAGER. Marketing Planning for wood based products and the problems involved. In Finnish; Eng. sum. Communicationes Instituti Forestalis Fenniae 87.3:93 pp. 1975.

Problems of marketing planning for Finland's wood products.

B1a LATHAM, E.B. The story of the Timber Trade Federation 1892-1973. Commonwealth Forestry Review 54(3/4):216-228. 1975.

Development and activities of the Federation (UK).

B1a SCHMELING, J. How can we make sure that West German forest owners can in future meet the demand for industrial wood in the West German wood-consuming industries? In German. Allgemeine Forstzeitschrift 330(35):685-689. 1975.

Possibility of organizing "service companies" to ensure continuous supplies to mills and prompt payment to owners.

B1a TOWLER, R. W. Tropical hardwood markets in UK. (III) Requirements and preferences of principal end users. (IV) An analysis of trends and prospects in the UK. Timber Trades Journal 394(5162; 5164):23-25, 19-20, 29. 1975.

B2 SANVICTORES, B.F. Moving away from log exports. Unasylva 27(108):10-14. 1975.

B3 AMERICAN EMBASSY IN CANBERRA. Lumber market potential in Australia. U.S. Department of Commerce, Pulp, Paper, and Board XXXII(2):1 pp. 1976.

Though the Australian softwood lumber market took less U.S. (West Coast) shipments in 1975 than in 1974, the prospects are good. Competition from Australian softwood plantations and from Canadian producers will not be significant.

V APPLIED TO MARKETING, TRADE, DEMAND FOR FOREST OUTPUT

B3 ERFURTH, T. The supply of logs for veneer slicing from tropical forests. Revue du Bois et de ses Applications 30(4):51-55. 1975.

World output, trade, and production policies, tropical veneer.
